## DETERMINING YOUR INTERIOR DOOR SIZE FROM YOUR FRAMING:

Standard door opening heights are 82 1/2" for 6'8" doors and 98 1/2" for 8' doors.

If you have a non-standard door opening height, we can adjust the doors to fit.

Order your doors 2" narrower than your opening to allow for door jamb and shims.

Order double doors 3" narrower if they have a t-astragal.

If your opening is 38" x 82 1/2" you would order a 3'0" x 6'8" door.

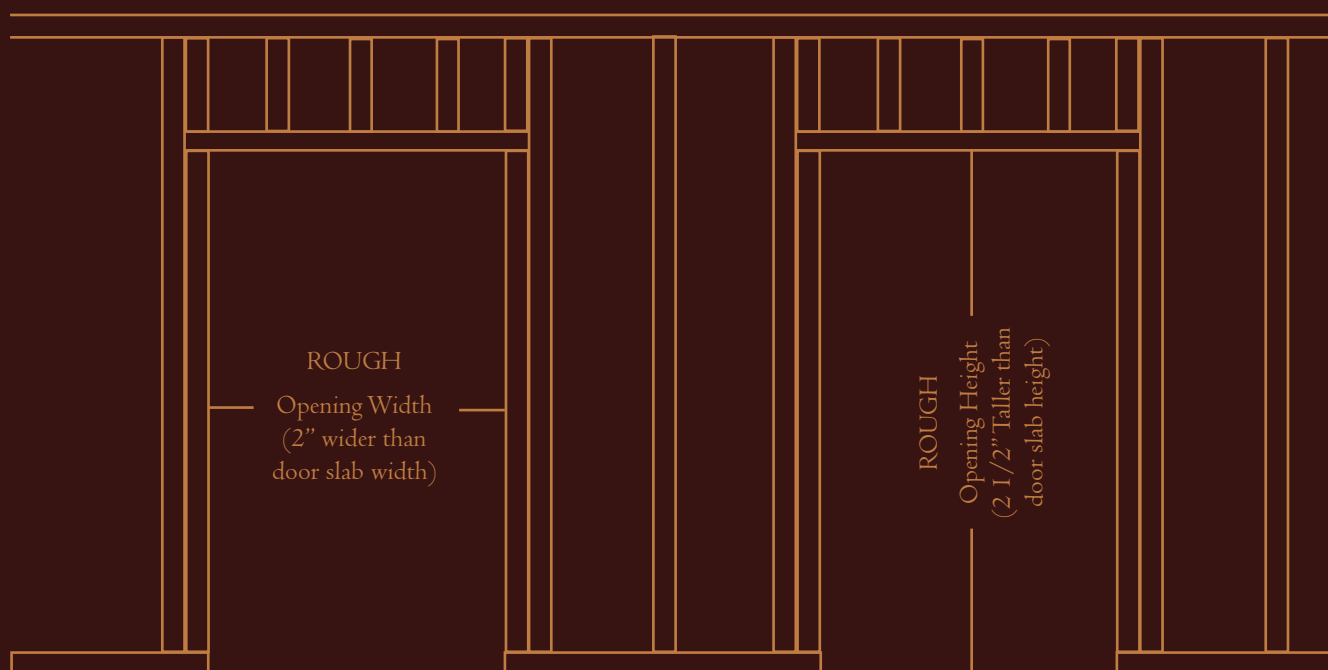

If your opening is 32" x 98 1/2" you would order a 2'6" x 8' door.

Jamb size is determined by your wall thickness.

2x4 walls with 1/2" sheetrock require 4 9/16" jamb.

2x6 walls with 1/2" sheetrock require 6 9/16" jamb.

Other jamb sizes are available to fit your wall thickness.

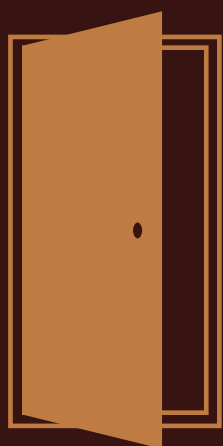

## DETERMINING YOUR INTERIOR DOOR SWING:

Stand in front of the door opening with the door swinging toward you.

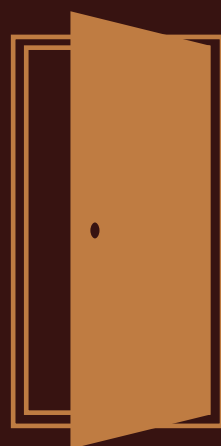

If the door knob needs to be on the right it's a Right Hand Door.

If the door knob needs to be on the left it's a Left Hand Door.

RIGHT HAND DOOR

LEFT HAND DOOR
